Jamestown Electro-Plating Inc.  
Mr. John Johnson  
105 Water St. Box 1137  
Jamestown, NY 14702-1136

Dear Mr. Johnson,

We appreciate your interest in PPG products and are responding to your request to William Lemons dated February 24, 2014 for information on the PPG Products, POWERCRON® CP415 and POWERCRON® CR665.

The EU Directive 2011/65/EU “Restriction on the Use of Certain Hazardous Substances” (RoHS) requires all Member States (per Article 4(1) of the Directive) to ensure that materials and components of electrical and electronic equipment put on the market after 1 July 2006 do not contain the following specific hazardous substances: lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls (PBBs) or polybrominated diphenyl ethers (PBDEs).

We have reviewed these products with regard to the EU Directive 2011/65/EU and based on our current knowledge of these products and the information (such as safety data sheets [SDSs]) provided to PPG by its raw material suppliers, the PPG Products POWERCRON® CP415 and POWERCRON® CR665 do not contain cadmium, hexavalent chromium, lead, mercury, polybrominated biphenyls (PBBs) or polybrominated diphenyl ethers (PBDEs) at levels greater than the tolerated maximum concentration values.

Do not hesitate to contact me if you have additional questions regarding PPG products.

Sincerely,

A handwritten signature in cursive script that reads 'Karen Beckmann'.

Karen Beckmann  
Manager, Industrial Coatings Product Stewardship
